The following is an examiner's statement of reasons for allowance: The closest art of record is the fastener of Ellis (US 2389298). While Ellis (figures 10, 11) teaches device structure for holding together, adjusting, fitting or fastening parts of a garment comprising a first part 11B containing several sheaths in the form of pockets having a magnet 12BB inserted in each sheath, the magnet being slidable inside the sheath, a second part 11A containing a second magnet 12AA subject or submitted to the magnetic attraction of the first magnet, wherein the first and second part are used to hold together, adjust, fit or fasten the garment when activated by a user by placing them together, a multitude of adjustments or alterations being possible through the sliding of the first magnet in the sheath and there is a means to activate the movable magnetic element remotely through the elastic system comprising the elastic band 30 connected to the movable magnetic 12BB so as to move the magnet within the sheath, claim 1 incorporates the

Art Unit: 3677

subject matter of original objected claim 2 and is therefore allowable as there is no suggestion in the art of record to further modify the fastener of Ellis so that the second magnet 12AA disclosed by Ellis as being fixed would be included and movable in a second sheath belonging to the second part as this would provide the advantage of greater adjustability. Similarly, with respect to claim 13, there is no suggestion to modify the magnet 12BB or magnet 12AA so that either is a series of at least two magnetic or ferromagnetic elements hinged together. Further, with respect to claim 26, there is no suggestion to modify the elastic band 30 to include a means for locking the elastic band in multiple positions that would provide for enhanced adjustability. While the elastic band 30 is a spring-operated system the equivalent of the means for motorization allowing sliding of the sheath relative to the held magnet in accordance with page 46, lines 21-23 of the specification, it fails to further have a means for locking the elastic band in multiple positions for adjustability and there is no suggestion in the art of record to modify the elastic band to have such a capability.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
